

Theta Distressed Credit Opportunities Pool – TDCOP US\$ share classes

31 Mar 2023

Monthly Commentary

TDCOP lost -0.34% in March. The global aggregate bond index returned +3.2%, reversing much of the negative return recorded in February. Developed market equities were also +3.2% higher for the month. March marked a significant development in the banking sector. The collapse of Silicon Valley Bank (SVB) and the takeover of Credit Suisse by UBS, along with broader concerns about the financial sector, resulted in a sharp decline in bank shares. This, in turn, led to interest rate volatility not seen since the 1980s and the Global Financial Crisis (GFC). Our funds had little exposure to the turmoil and managed their risk well. Fund 3 being the largest contributor in March, returning +2.6% and contributing 46bps to the total performance, primarily driven by their active hedging program. Other funds in TDCOP were slightly down or close to flat for the month. Distressed debt situations continue to be on the rise and there are already significant opportunities for our specialist managers. We will continue to optimally position our portfolio to take full advantage of this long-awaited distressed cycle, which is expected to present a level of opportunities that hasn't been seen in a very long time.

Co-Investment

Theta Capital Management offered to qualified investors to join a co-investment in ZAIS Zephyr 7 Fund per October 1st 2020. The investment offered a highly attractive opportunity to invest in CLO tranches at dislocated prices. The investment was offered to qualified investors as a co-investment directly into the fund as the liquidity structure of the investment did not fit TDCOP. Per December 2021 the investment has been fully returned to investors and has generated a net fund return of 39% IRR to investors (excluding fees charged by Theta Capital Management) over a 14 month period.

Fund Strategy & Description

TDCOP will allocate to 4-8 specialist managers at any time, depending on the evolving opportunity set, with a focus on investing in dislocated credit instruments and distressed debt and restructuring opportunities. TDCOP will allocate to managers in the structured credit, corporate and sovereign credit space in both developed and emerging markets that have the experience and infrastructure to capitalize on the increased volatility and dispersion in markets as well as anticipated restructurings and liquidations. Attractive investment opportunities have been limited for distressed debt managers in recent years. We have used this period to secure capacity with the best managers who have been closed to new capital but are now opening up to capitalize on the suddenly vastly expanded opportunity set.
